

INFORMATION SHEET

PHLEBOGRAPHY

Information on the X-ray

Purpose of the examination

Radiological examination of the leg veins is necessary to accurately determine the extent of varicose veins and to visualize fresh or ongoing thrombosis (blood clots).

Information on the examination

Please make an appointment for this examination and bring the following with you to the examination:

- **E-card and photo ID**
- **Original assignment (it must still be valid)**
- **A current blood report (not older than 2 months), in which your kidney values (creatinine, GFR) and your TSH thyroid value were determined**

We do not perform X-ray examinations on pregnant patients in our practice!

In case of known allergy to intravenously administered iodine-containing contrast agents, a phlebography is not performed in our practice.

If you are under 14 years old, you must come to the examination accompanied by a parent or guardian or bring a written consent form.

Preparing for the examination

No special preparation is necessary for the examination.
